

Question No. #1

Construct a Binary Search Tree by inserting following values:

50, 20, 10, 70, 60, 15, 18, 65, 55, 52

Answer :

Root

↓  
Left Subtree

↓  
Right Subtree

Preorder Sequence (1st time visit) →  
50, 20, 10, 15, 18, 70, 60, 55, 52, 65

Inorder Sequence (2nd time visit) →  
10, 15, 18, 20, 50, 52, 55, 60, 65, 70

Postorder Sequence (3rd time visit) →  
18, 15, 10, 20, 52, 55, 65, 60, 70, 50
