

KARTHIKEYA VENKATA RAYUDU

Aspiring Frontend / Web Developer

Email: karthikeyavolety2103@gmail.com | Phone: +91-9160551236 | LinkedIn: linkedin.com/in/karthikeyavolety | GitHub: github.com/karthikeyavolety

OBJECTIVE

Motivated and detail-oriented frontend developer with hands-on experience building static and responsive websites using HTML, CSS, Bootstrap, JavaScript, and Python. Seeking an opportunity to apply strong fundamentals in web development, programming, and databases to contribute to real-world projects and grow as a software professional.

EDUCATION

SRM University — B.Tech (Your Branch)

Coursework: Programming in C, C++, and Python — covering core programming logic, data structures, OOP concepts, and problem solving.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Python
- **Web Technologies:** HTML5, CSS3, Bootstrap, JavaScript
- **Databases:** SQL & DBMS fundamentals (queries, schema design)
- **Concepts:** Responsive Web Design, Static & Dynamic Web Applications, Version Control basics

PROJECTS

Tourism Static Website | HTML, CSS, Bootstrap

- Built a mobile-responsive static website to showcase popular tourist destinations with images, videos, and descriptive content.
- Designed a clean, beautiful layout using Bootstrap components and published the site for public access.

Food Munch & E-commerce Listing Website | HTML, CSS, Bootstrap

- Developed a fully responsive food ordering website that adapts seamlessly to screens of any size.
- Created an e-commerce product listing page for small businesses applying Bootstrap fundamentals such as grids, cards, and navigation components.

Dynamic Web Applications (Todos, Counter, Bomb Defuser, Chatbot, Wikipedia Search) |

HTML, CSS, JavaScript

- Built multiple interactive JavaScript applications including a Todos app, Counter app, Bomb Defuser game, Chatbot web app, and a Wikipedia Search application.
- Applied core JavaScript concepts such as DOM manipulation, event handling, state management, and API integration to create dynamic user experiences.

Unlock My Keys — Password Storage Website | GitHub: github.com/karthikeyavolety/unlock-my-keys

- Built a web application to securely store and manage passwords, focusing on simple UI and organized credential management.

Smart City AI — Traffic Risk Predictor | GitHub: github.com/karthikeyavolety/smart-city-ai-risk

- Developed a small website that predicts traffic risk levels, applying basic data-driven logic to support smart city safety concepts.

HACKATHONS

Code4Her — SRM University | GitHub: github.com/karthikeyavolety/business-boost-ai

- Built "Business Boost AI", a project focused on smart inventory and sales control techniques to help businesses decide what products to stock and sell based on demand patterns.

RELEVANT COURSEWORK (NxtWave - CCBP 4.0)

- Build Your Own Static Website — HTML, CSS, Bootstrap
- Build Your Own Responsive Website — HTML, CSS, Bootstrap
- Introduction to Databases — SQL & DBMS
- Programming Foundations — Python
- Build Your Own Dynamic Web Application — HTML, CSS, JavaScript

CERTIFICATIONS

- NxtWave CCBP 4.0 — Programming Master Growth Cycle, Certificate of Completion
- MCP (Model Context Protocol) Workshop — Completion Certificate

STRENGTHS

- Quick learner with strong problem-solving and analytical thinking
- Self-driven, completed multiple structured learning programs consistently
- Good understanding of responsive design principles and clean UI development
